

## **Section Guidelines for OSB Law Improvement Program**

*This document is intended to provide section leaders with a framework for engagement in the Legislative process on behalf of an OSB Section.*

Sections have the opportunity to participate in the legislative process through the OSB Law Improvement Program. The Communications and Public Affairs Department is available to assist sections with bill tracking and sponsoring legislation. Public Affairs may also occasionally ask sections to provide analysis on key bills relating to their area of expertise during the legislative session. Each bar section is encouraged to have a legislative subcommittee tracking the legislative process, as assistance from bar groups is invaluable.

Sections that wish to sponsor legislation or take a position on any bill, rule or public policy issue must comply with Article 11 of the [OSB Bylaws](#) and bar policy, as well as [Standard Section Bylaw](#) Article VIII, Section 1 & 2. In summary, sections may not represent a position or make a policy proposal without majority approval of the Executive Committee members and the approval of the Board of Governors, though the OSB Communications and Public Affairs Department.

If your section wishes to submit a request to take a position on current legislation, please complete the request form [here](#) and contact Dominique Rossi, Director of Public Affairs at [drossi@osbar.org](mailto:drossi@osbar.org). The request should identify the section's position and supporting analysis and identify how the proposed feedback meets the Legislative Guidelines established by the Board of Governors in OSB Bylaw Article 11.1.

After the Section Executive Committee and Board have approved a proposal, the section chair or chair's designee may act on subsequent time-sensitive legislative or policy issues, after consultation with the Communications and Public Affairs Department, consistent with the approved proposal. In most cases, the section will be responsible for [lobbying](#) for the position or testimony of that bill. Only positions that are identified by the Board of Governors' Public Affairs Committee as bar priorities are lobbied by Public Affairs staff.

Public Affairs staff are available to assist with developing section proposals and appreciate being informed of executive committee or legislative subcommittee meetings dealing with legislative issues, in order to stay current on the status of projects and ensure that interested parties are connecting throughout the development and drafting process.
