MEMORANDUM

TO: All Oregon Judicial Department Judges and Staff
All Oregon State Bar Members

FROM: Nancy J. Cozine
State Court Administrator

RE: Notice of Email Phishing Incident

On Monday, July 15, 2019, the Oregon Judicial Department's Enterprise Technology Services Division discovered a phishing incident that affected approximately five OJD user email accounts, potentially compromising personal information of OJD employees and members of the public. OJD took immediate action and effectively minimized the number of internal and external individuals whose email accounts and information may have been compromised.

OJD is currently assessing the scope and extent of information that may have been exposed to determine if there are affected parties who are entitled to any notices required by law. At this time there is no reason to believe that the email accounts of members of the Bar or of the public generally have been compromised as a result of the incident. OJD will provide additional information as the process continues.

OJD would like to remind everyone to refrain from clicking on links, or sharing their password credentials, without first verifying the validity of the link and ensuring that requests for password credentials are related to legitimate requests.

Thank you for your patience as we continue to investigate this incident.
